IMPORTANT INFORMATION

- INCLUDE TASK ASSIGNMENTS OR MOVEMENTS, REFLECTION ON THE DAY'S NEW LEARNING, ACCOMPLISHMENT, CHALLENGES FACED AND HOW YOU RESPONDED, OBSERVATIONS AND RECOMMENDATIONS ON THE IMPROVEMENT OF SYSTEMS / OPERATION / MANAGEMENT, ETC.
- SCANNED COPIES OF THIS FORM SHALL BE SUBMITTED ON A WEEKLY BASIS THROUGH APPROVED LMS.
- HARD COPIES OF THIS FORM SHOULD BE COMPILED AS PART OF THE STUDENT'S PORTFOLIO.

DATE	April 21 to 24, 2026	AREA ASSIGNMENT	ICTO
TASK	Pre-Assessment and Development Setup	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

April 21. Completed the pre-assessment and reviewed the skills needed for practicum tasks.

April 22. Set up VS Code, XAMPP, and the local development environment.

April 23. Created a basic web page and handled user input through forms.

April 24. Debugged coding errors and improved the output based on the requirements.

Technical Documentation:

April 21. Listed the technical areas that needed improvement after the assessment.

April 22. Recorded the setup procedures and tool configuration requirements.

April 23. Documented how the forms and user inputs were organized.

April 24. Noted the corrections made during code refinement and testing.

IT Operations:

April 21. Checked the workstation and identified the tools required for development.

April 22. Installed and configured VS Code, XAMPP, PHP, and MySQL locally.

April 23. Started Apache and MySQL and verified that the localhost setup worked.

April 24. Organized the project files and confirmed that the local services were stable.

DATE	April 27 to 30, 2026	AREA ASSIGNMENT	ICTO
TASK	Database Management and System Architecture	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

April 27. Planned the system architecture for the Binan Access Card project.

April 28. Created a DFD for applicant and family information processing.

April 29. Designed the ERD for family heads, members, and sector classifications.

April 30. Reviewed the database structure and applied normalization principles.

Technical Documentation:

April 27. Documented the initial system flow and information requirements.

April 28. Prepared notes explaining the movement and processing of data in the DFD.

April 29. Documented the relationships between records and tables in the ERD.

April 30. Recorded the normalized database structure for accuracy and scalability.

IT Operations:

April 27. Created the local project workspace and prepared the database environment.

April 28. Verified the MySQL service and reviewed the initial database tables.

April 29. Checked table relationships and key fields using the database tools.

April 30. Saved a backup copy of the reviewed database structure.

DATE	May 4 to 8, 2026	AREA ASSIGNMENT	ICTO
TASK	ERD Finalization and Mock Design Planning	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

May 4. Continued improving the ERD and database structure.

May 5. Revised tables, primary keys, foreign keys, and relationships.

May 6. Finalized the ERD and checked its arrangement before approval.

May 7. Started planning the system mock design after the ERD was approved.

May 8. Planned the pages, buttons, forms, layout, and navigation flow.

Technical Documentation:

May 4. Documented the ERD revisions and database accuracy checks.

May 5. Recorded how the revised structure aligned with system requirements.

May 6. Prepared the final ERD notes and important table relationships.

May 7. Created mock-design notes based on the approved ERD.

May 8. Documented the proposed interface layout and navigation flow.

IT Operations:

May 4. Opened the local database and verified the revised table structure.

May 5. Checked key constraints and relationships using MySQL tools.

May 6. Exported the approved database design as a working backup.

May 7. Organized the approved design files in the project workspace.

May 8. Maintained the latest local copies of the ERD and interface references.

DATE	May 11 to 15, 2026	AREA ASSIGNMENT	ICTO
TASK	UI Design, Back-End Planning, and Gantt Chart	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

May 11. Improved the login-page mock design, layout, and spacing.

May 12. Worked on the dashboard overview and organized the Gantt Chart.

May 13. Defined Developer, Admin, and Employee roles and restrictions.

May 14. Planned how the front-end and back-end components should work together.

May 15. Improved the login page, dashboard, and input validation.

Technical Documentation:

May 11. Documented the login-page mock-design improvements.

May 12. Prepared the Gantt Chart for tasks, schedules, and deadlines.

May 13. Recorded the planned user roles and permissions.

May 14. Documented the proposed front-end and back-end flow.

May 15. Recorded validation fixes and interface-design changes.

IT Operations:

May 11. Checked the login-page mockup in the local project environment.

May 12. Organized current project files and development references.

May 13. Prepared local test accounts for the planned user roles.

May 14. Verified that Apache, MySQL, and the project path were accessible.

May 15. Saved the latest interface and planning files for team use.

DATE	May 18 to 22, 2026	AREA ASSIGNMENT	ICTO
TASK	Database and Back-End Development	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

May 18. Reviewed SQL tables for users, members, sectors, services, and audit trails.

May 19. Checked how forms save, retrieve, and update database records.

May 20. Reviewed the relationship between members and sector classifications.

May 21. Improved back-end logic for user roles and permissions.

May 22. Reviewed the audit-trail feature for recording user actions.

Technical Documentation:

May 18. Documented the database tables and important system fields.

May 19. Recorded how form inputs connect to database records.

May 20. Documented the member and sector relationship.

May 21. Documented the role-validation logic for each account type.

May 22. Recorded the purpose and structure of the audit trail.

IT Operations:

May 18. Started MySQL and inspected the current tables and records.

May 19. Ran basic queries to verify record creation, retrieval, and updates.

May 20. Checked foreign-key links between member and sector data.

May 21. Tested local access using accounts with different roles.

May 22. Verified that audit records were stored after user actions.

DATE	May 25 to 26 and May 28 to 29, 2026	AREA ASSIGNMENT	ICTO
TASK	System Flow and Database Review	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

May 25. Continued revising the database structure and member table.

May 26. Tested the flow from login to database updating on localhost.

May 28. Reported from 1:00 PM to 5:00 PM and reviewed member and sector data.

May 29. Reviewed user roles, database components, and the overall system flow.

Technical Documentation:

May 25. Documented database revisions and member-table concerns.

May 26. Recorded the flow from login to database updating.

May 28. Documented clarifications regarding member and sector records.

May 29. Organized documentation for the completed system components.

IT Operations:

May 25. Updated the local database and checked the revised member table.

May 26. Ran the application on localhost and verified database connectivity.

May 28. Checked member and sector records during the half-day shift.

May 29. Saved a database backup and organized the latest project files.

DATE	June 1 to 5, 2026	AREA ASSIGNMENT	ICTO
TASK	System Development Review	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

June 1. Reviewed the system flow from login to dashboard access on localhost.

June 2. Checked how system features connect with stored database records.

June 3. Reviewed back-end issues, database connection, and page access.

June 4. Checked completed project components and identified improvements.

June 5. Continued checking database progress, user roles, and system flow.

Technical Documentation:

June 1. Documented the current system flow and local testing progress.

June 2. Recorded the connection between stored records and system features.

June 3. Noted issues found during back-end checking and testing.

June 4. Documented the overall progress and remaining tasks.

June 5. Updated notes for the database, roles, and remaining features.

IT Operations:

June 1. Started the local services and verified login and dashboard access.

June 2. Queried stored records to confirm that features displayed correct data.

June 3. Checked XAMPP, the database connection, and route accessibility.

June 4. Organized test files and saved the latest working database copy.

June 5. Verified role-based access and the stability of the local environment.

DATE	June 9 to 11, 2026	AREA ASSIGNMENT	ICTO
TASK	Model and Database Function Checking	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

June 9. Reviewed database models and how system records were retrieved.

June 10. Checked model functions for creating, reading, and updating records.

June 11. Reviewed user-role restrictions and access to assigned system areas.

Technical Documentation:

June 9. Documented observations on the model structure and data retrieval.

June 10. Recorded the model functions used to manage database records.

June 11. Documented the access restrictions and permissions for each role.

IT Operations:

June 9. Used local database tools to confirm the records returned by models.

June 10. Ran basic queries and checked create, read, and update operations.

June 11. Tested role-based accounts and verified restricted page access.

DATE	June 15 to 16 and June 18, 2026	AREA ASSIGNMENT	ICTO
TASK	Model Development and System Testing	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

June 15. Continued reviewing and improving the system model functions.

June 16. Reported from 1:00 PM to 5:00 PM and checked model functions and records.

June 18. Tested the local system and reviewed database-model-page connections.

Technical Documentation:

June 15. Documented model functions and database-processing improvements.

June 16. Recorded the model and database components reviewed during the half day.

June 18. Documented results and observations from local system testing.

IT Operations:

June 15. Ran the local application and verified model-to-database queries.

June 16. Checked database records and model outputs during the half-day shift.

June 18. Verified Apache, MySQL, routes, and page access during system testing.

DATE	June 22 and June 25 to 26, 2026	AREA ASSIGNMENT	ICTO
TASK	Database Integration and Version Control	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

June 22. Reviewed and updated model queries used to process database information.

June 25. Checked the repository and code updates in the assigned branch.

June 26. Tested database integration with model functions and system pages.

Technical Documentation:

June 22. Documented the model-query updates and their purposes.

June 25. Recorded the code and branch changes made during development.

June 26. Documented the database-integration and model-testing results.

IT Operations:

June 22. Ran database queries and verified the updated model results locally.

June 25. Fetched repository updates and reviewed the assigned Git branch.

June 26. Started local services and confirmed page-to-database connectivity.

DATE	June 29 to July 3, 2026	AREA ASSIGNMENT	ICTO
TASK	Category, Service, and Database Updates	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

June 29. Reviewed the category, sector, services, and programs tables.

June 30. Updated descriptions and information in category and service records.

July 1. Tested whether the updated descriptions appeared correctly in the system.

July 2. Reviewed model validation and compliance with the MVC structure.

July 3. Verified that the updated database returned the correct records.

Technical Documentation:

June 29. Documented the database tables and records requiring updates.

June 30. Recorded the revised descriptions and database information.

July 1. Documented the results of testing the updated descriptions.

July 2. Recorded model-validation and MVC-structure observations.

July 3. Updated the database change notes and record-checking results.

IT Operations:

June 29. Inspected the current category, sector, service, and program records.

June 30. Ran SQL updates for the revised descriptions and information.

July 1. Refreshed the local database and verified the displayed records.

July 2. Checked model queries and local application configuration.

July 3. Exported the updated database as a backup for the team.

DATE	July 6 to 10, 2026	AREA ASSIGNMENT	ICTO
TASK	Local Testing and Database Finalization	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

July 6. Resolved XAMPP, MySQL, and database issues in the local environment.

July 7. Reported from 1:00 PM to 5:00 PM and reviewed system flow and models.

July 8. Reviewed the database and added category and service descriptions.

July 9. Tested whether updated records and descriptions displayed correctly.

July 10. Conducted a final review of the database, models, and system functions.

Technical Documentation:

July 6. Documented local-environment issues and the steps used to resolve them.

July 7. Recorded the half-day review of system flow, records, and model functions.

July 8. Documented changes included in the updated database version.

July 9. Recorded the results of testing updated records and descriptions.

July 10. Updated final notes for the database, models, and completed functions.

IT Operations:

July 6. Restarted and configured XAMPP and MySQL for local access.

July 7. Checked local services, database records, and model outputs.

July 8. Imported the updated database and verified the revised descriptions.

July 9. Ran queries and confirmed that updated records displayed correctly.

July 10. Exported the finalized database and organized the working files.

DATE	July 13 to 17, 2026	AREA ASSIGNMENT	ICTO
TASK	Rice Subsidy System Deployment and Support	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

July 13. Tested the Binan Access Card system on laptops connected to the server.

July 14. Monitored QR scanning and claim validation during the first subsidy day.

July 15. Supported system use and checked the claimed-status updates.

July 16. Monitored the final subsidy-day transactions and system responses.

July 17. Reviewed deployment records and issues noted during the three-day event.

Technical Documentation:

July 13. Documented the network, laptop, scanner, and server setup procedure.

July 14. Recorded first-day deployment observations and reported issues.

July 15. Updated notes on system performance and claim processing.

July 16. Documented final-day observations and completed support records.

July 17. Summarized the three-day rice-subsidy deployment results.

IT Operations:

July 13. Set up the network and connected laptops and scanners to the server.

July 14. Maintained device connectivity for QR-based claims from six barangays.

July 15. Checked server access, scanners, and network stability for six barangays.

July 16. Supported the final six barangays and monitored connected equipment.

July 17. Checked the equipment and backed up the subsidy transaction records.

DATE	July 20 to 24, 2026	AREA ASSIGNMENT	ICTO
TASK	Post-Deployment Review and Practicum Turnover	SHIFT/TIME	8:00 AM to 5:00 PM

Software Development:

July 20. Reviewed model queries and database consistency after deployment.

July 21. Checked role permissions and data retrieval using test accounts.

July 22. Performed final regression checks on the local system modules.

July 23. Reviewed remaining model files for consistency and maintainability.

July 24. Completed the final system review and organized turnover-ready files.

Technical Documentation:

July 20. Updated deployment notes and the list of resolved issues.

July 21. Prepared a summary of database and role-permission checks.

July 22. Completed the final testing checklist and results documentation.

July 23. Organized technical notes for system maintenance and handover.

July 24. Finalized practicum outputs and turnover documentation.

IT Operations:

July 20. Exported and verified a post-deployment database backup.

July 21. Checked local and server configuration references for continuity.

July 22. Verified the repository branch and organized the final code copy.

July 23. Consolidated database backups, test files, and deployment records.

July 24. Performed a final file check and prepared the project assets for turnover.
