SUMMARY

Graduating Bachelor of Science in Information Technology student with hands-on practicum experience as a Web Systems Developer and IT Support Intern in a local government environment. Skilled in web-based information systems, database work, system testing, documentation, user support, basic networking, and software and hardware troubleshooting. Seeking an entry-level role in IT support, systems development, quality assurance, or web applications.

WORK EXPERIENCE

CITY GOVERNMENT OF BIÑAN	Web Systems Developer and IT Support Intern	Apr 2026 – Jul 2026
Biñan City, Laguna		
Assigned Project: Biñan Access Card Management Information System		
- Contributed to the Biñan Access Card Management Information System using Codelgniter 4, PHP, MySQL, Bootstrap, jQuery, and Ajax. - Assisted with system models, database updates, data validation, testing, documentation, and Git-based team collaboration. - Provided IT support involving Windows, XAMPP, Apache, MySQL, phpMyAdmin, development-environment configuration, and basic hardware and software troubleshooting. - Assisted with basic network setup and troubleshooting, including LAN connectivity, Ethernet cable checks, IP address configuration, and internet-access support for office workstations. - Supported the live deployment of the Biñan Access Card system during a three-day rice subsidy distribution. The system used QR-code scanning and validation to confirm beneficiary eligibility before releasing approximately 25,000 sacks of rice across 18 barangays, serving six barangays per day. - Assisted distribution personnel and users during on-site operations through QR-code verification, beneficiary validation, scanner support, and basic system troubleshooting.		

ACADEMIC PROJECTS AND RESEARCH

PLANTERAID	Capstone Project	Aug 2025 - Jul 2026
Web-Based Soil Monitoring and Recommendation System		
- Developed an IoT-enabled web-based soil monitoring and recommendation system designed to monitor soil moisture, temperature, humidity, and location data and provide recommendations that support field decisions. - Technology stack: C#, Blazor .NET Core 8.0, HTML, CSS, JavaScript, SQL Server, SQL Server Management Studio, Arduino IDE, ESP32/Lolin32, soil-moisture sensor, SHT31 temperature and humidity sensor, and GPS integration.		
E-COMMERCE TICKETING SYSTEM	Web Developer	Mar 2024 – May 2024
Developed a movie ticketing system using ASP.NET (C#) with an MS Access (MDB) database, featuring ticket booking and movie distributor management.		

EDUCATION
