PROFESSIONAL SUMMARY

Graduating Bachelor of Science in Information Technology student with hands-on practicum experience in web systems development and IT support within a local government environment. Skilled in PHP, CodeIgniter 4, MySQL, system testing, basic networking, and hardware and software troubleshooting. Seeking an entry-level role in IT support, systems development, quality assurance, or web applications.

WORK EXPERIENCE

CITY GOVERNMENT OF BIÑAN

Biñan City, Laguna

Web Systems Developer and IT Support Intern

Apr 2026 - Jul 2026

Assigned Project: Biñan Access Card Management Information System

- Contributed to system development using CodeIgniter 4, PHP, MySQL, Bootstrap, jQuery, and Ajax.
- Worked on system models, database updates, data validation, testing, documentation, and Git-based team collaboration.
- Supported the live QR verification system during a three-day rice subsidy distribution across 18 barangays, helping validate eligible beneficiaries before approximately 25,000 sacks of rice were released.
- Provided on-site support for QR scanners, beneficiary verification, Windows workstations, XAMPP, LAN connectivity, Ethernet cabling, IP configuration, and basic hardware and software troubleshooting.

PROJECTS
